

PERFECT Style 21

PRODUCT DESCRIPTION

This packing, constructed from HIGH TENSILE STRENGTH PTFE YARN, which incorporates high quality graphite particles for better heat transfer. The constituents impart improved thermal conductivity heat dissipation, lubricity, and low thermal expansion and low coefficient of friction.

SERVICE PARAMETERS

Maximum Service Temperature:

-240 to +300 °C

Compatible pH Range:

0 to 14 ph range

Pressure Rating:

300

Velocity

25 Mtrs/sec.

SERVICE

The packing is developed for high speed shafts in rotating, reciprocating and static services, valve stems, slurry and high pressure applications against chemicals, acids and alkalies, oils pump and paper etc.

Information supplied in this catalogue, is based on our general experience and is given in good faith, because of the many particular factors, which are out side of our knowledge and control and affect the use of products, nowarranty is given is to be implied with respect to such information.
